Binh-Nguyen Ngo

I have built 30+ projects in groups or on my own and I am looking for a Software Engineering role, where I can grow by constantly testing my critical thinking skills and cultivating my ability as a growing engineer.

PROJECTS

Eatsy — *Creator*

- Food delivery service for home cooks. Built with React.js, Node.js, Socket.io, and MongoDB
- Voted best UI/UX design and best overall project

Code Tools - Creator

- Cheatsheet for everything I learned from AWS CDK, React, Leetcode, etc. that I deem useful to record in order for myself and others to remember. Created with React and deployed with AWS CDK.

Pomodoro Timer - Creator

- This productivity timer is a Next.js project that is written in Typescript, styled with Tailwind, and is deployed on AWS through CDK.

Video-Share — *Creator*

- Video conferencing web application that allows the user to share their screen, videos, and real-time text chat thanks to Socket.io. Built with Materialize, Sequelize, and Node.js.

EDUCATION

University of Washington, Seattle, WA

EdX Boot Camps, *Certificate of Completion*

DECEMBER 2022 - MARCH 2023
Full Stack MERN Developer

Experience

AWS Tip, Remote - Technical Writer

MAY 2023

- Demonstrated expertise in creating informative and engaging content about AWS Cloud Development Kit (CDK) and its features.
